

EEPNolie Tunneltexture

Some models in EEP use exchange textures. This is a texture for the free “shield” models made by AS1 (Free model V72FreeAS1_018), which can be downloaded here :

http://www.alice-dsl.net/dr18201/EEP7/V72FreeAS1_018.zip

The set uses 2 “shield” models :

Included are 2 pictures :

- TunnelTT_EEPNolie_L.png (lighted version)
- TunnelTT_EEPNolie_D.png (dark version)

They can be used as a replacement texture for the 15x10m (1024x768) shield, which should be set up in the standing position ($x=90^\circ$). You can then place it in a tunnel entrance.

Example :
