# EEP-17+ Settings Editor (2.xx)

This tool you can be used for EEP version 17 and above. It's designed to easily change some settings in EEP and make this changes to the Windows registry.

### Warning message at program start

At the first start, the program gives you a warning message. This information is important, as the tool changes the registry settings, but a running EEP-version has first to be closed, otherwise the changes have no effect. The warning screen remembers you for this, but can be avoided by deselecting the option "Show this warning message at program start".

EEP-17+ Settings Editor		
WARNING ! To apply the changes to the registry correctly, no EEP-version may be running as a Close EEP before applying the changes from this program to the registry.	n active EEP-version wi	ll write it's own settings.
Show this warning message at program start

There are also 3 buttons available, one to make the changes in the Windows, one to reload the current registry settings and one to save the changes to a file that can be used to import the saved settings to the Windows registry.

# **Registry settings section**

In this section you can edit :

- the paths for the layouts and media
- the name of the last used layout (or reset it to "Demo")
- the location of the external LUA editor
- the docking of the Control dialogue and the Overview window
- enabling/disabling auto-save message
- hide/show depreciated models
- number of maximum selectable items in 2D window

3 Buttons are available :

**Important** : changing to another EEP-version tab discards your changes without notice. When an EEP-version tab is selected the actual registry settings are always reloaded.

#### **Buttons**

Das Handbuch kann über die Schaltfläche geöffnet werden die angezeigt wird, wenn die entsprechende Handbuchdatei in der ausgewählten Sprache verfügbar ist.
